

NATUZZI EDITIONS

NEW COLLECTION

for You

There are many roads leading to comfort. We walk all of them, to find the right comfort for each of you.

THE VALUE OF CHOOSING

Events, history and products tell us what we are. Every single step, every moment, every detail is the culmination of over 60 years of commitment and passion. Our quality is as tangible as the materials we choose, as the expert hands of our craftsmen who transform them in our factories, as the ideas of the designers expressed on a sheet of paper, and as the testing team who put them to the test and experiment with them. The whole supply chain is managed ethically and responsibly. That is the only way we can believe in a more comfortable future, made up of cutting-edge, versatile, functional products. And made up of designs that improve lives. For everyone.

ITALIAN *Design*

Everything starts at the Natuzzi Style Centre in Italy. This is where we explore trends, where we come up with new ideas and design breakthrough solutions. That is where we breathe life into every single product. A unique workshop that embodies creativity, experience and reliability.

Control OF THE OVERALL PROCESS

Each phase, each step, each process is checked tirelessly to ensure you get what you deserve - the very best. That's why we directly control 92% of our raw materials and put each product through stringent tests to guarantee its quality. It all happens here at Natuzzi.

CERTIFIED *Quality*

Both the leathers and the yarns used for the fabrics are individually selected, the woods used to make the looms come from renewable forests, the polyurethane used for the padding is manufactured without using freon and other blowing agents. Not just words, but serious commitments, certified, approved quality and sustainability objectives.

NATUZZI *Craftsmen*

Production takes place in our factories, where our highly skilled craftsmen, with their unrivalled know-how that has been handed down for generations, give form to exclusive products. Needles, thread, hammers and machinery are the tools we use every day. Nothing could be more genuine.

Proof OF COMFORT

Stepping into a Natuzzi Editions shop means coming into contact with people who have made reliability their professional mission. This is reflected in products that are durable and original, in our tailor-made services, and in our dependability and expertise. Every single time. The aim is to offer you personalized comfort both in the welcome you are given and in the experience you then enjoy with our products.

Made IN NATUZZI

From the first stroke of the pen on the designs through to delivery, we watch each step like a hawk. Italian style, impeccable quality and all-round comfort made accessible through extremely versatile, functional, innovative and handcrafted products. This is our mission, amazing value which only Natuzzi can provide.

CRAFTED FOR HUMANS

What is a desire? Desire is something intimate and personal that leads us on a journey from our current state to the condition we want to be in. It is the driving force behind that journey. A path towards fulfilment. It is what we think about as soon as the alarm clock rings in the morning and the moment before we fall asleep. Desire is part of everyone's daily life, along with countless achievements and just as many hardships. It distinguishes us, shakes things up, and accompanies us. For over 60 years, here at Natuzzi Editions we have been exploring the desire for aesthetics, comfort and wellbeing so that we can create products that match your ideas and ne-

eds as closely as possible. It is your way of life, your habits, your uniqueness that inspire our work. Everyone has different spaces to furnish, different plans to undertake, different needs to satisfy. That is why we explore all kinds of styles, from the most classical to the most cutting-edge, and combine them with the trends and moods that suit them best. We look for the best solutions for every space, from functional urban environments to eclectic residential homes. We listen to your many demands for relaxation and comfort so that when you return home after a long day, our products are ready to give you the best possible welcome – your way. We achieve this by putting together all the ingredients we have learned about, step by step, during the lifetime of Natuzzi – innova-

tion, versatility, design and functionality. A perfectly balanced recipe for each product. For each and every one of you. That is the only way we can ensure that children can bounce around on our seats, that the more laidback among us can stretch out on every part of the sofa to their heart's content, that social media addicts can recharge their devices by connecting them to the sofa, that party hosts can let their friends sleep over on practical sofa beds, that dogs and cats can curl up on easy-to-wash fabrics, that fashionistas can show off the trendiest designs and covers, and that everyone feels perfectly at home.

THE LESSONS OF EXPERIENCE

Hands, fragrances, sounds. What happens inside the workshops is pure magic. With their decades of experience, Natuzzi workshops reflect and embody the quality and values that have shaped the history of the Italian sofa since 1959: innovation, versatility, craftsmanship and design. And from its parent company, Natuzzi Editions has inherited its international dimension, one which enables us to identify trends, needs and influences, and translate them into the uniqueness of Made in Natuzzi pro-

ducts. Throughout our history, from the first tiny workshop, to the invention of colourful sofas in the 1980s to experiments in the digital field, Natuzzi has always been one step ahead. Our search for new ideas, our attention to detail, our painstaking selection of materials, our craftsmanship, all this is carried out with just one aim - to fulfil your desires. We do this thanks to a workforce with a wealth of experience of incomparable value handed down from one generation to the next, a story filled with passion. These are the people who make your sofas, who design them, build them, test

them and bring them into your homes. Over our 60 years of intense activity we have learned to use a needle and thread to sew, weave, stitch and decorate; we have learned to work with wood to build, support and give shape; we have become familiar with padding in order to fill, accommodate and bolster; we have learned innovate ways to lift, stretch and relax; we have learned to upholster in order to embellish, customize and give colour. We have learned all of this and we are still learning.

THE WEALTH OF DIVERSITY

We believe that we can never stop learning and that creating a better life involves pushing ourselves beyond our own limitations and assumptions. People, colours, places, everything around us is a source of inspiration for our daily work. That is why we try to take into account a wide variety of desires for comfort and beauty. How do we do that? Quite simply, we try to explore all possible avenues to help make your desires come true. From the ultra classical to the super modern, the collection spans countless styles, making them accessible at all times

through its various sizes, configurations and coverings. Everything is possible here at Natuzzi Editions. Whether it is 2 seats or 10, it makes no difference. Linear, modular or corner sofas to suit all kinds of environments and needs. And coverings are our passion. From the striking grains on animal hides to the surprising textures of refined fabrics, via the functional Protecta leathers and the whole new range of high-performance upholstery, designed so that you can let children and our four-legged friends loose on the sofa without worrying about damage. And for the more demanding customer, we have designed

mechanisms and comfort functions that will leave everyone speechless. Added to that is the sheer number of details made by our craftsmen. Pinched seams, contrasting piping, hand-buttoning or matelassé stitching, decorative quilting, combinations of leathers and fabrics, wood and metal bases and much more. No matter what your style or way of life, Natuzzi Editions is sure to have the right sofa for you.

THE REWARD OF RESPONSIBILITY

Never before has the world asked us to take on so much responsibility for safeguarding and protecting mankind and the environment. We've been doing that since the very start. We monitor the whole production process to make sure that quality standards and our values are upheld at every stage along the value chain. This is a firm commitment, one that is not just stated, but certified. ISO 9001 Quality Certification ensures that our quality process complies with international regulations and meets customer expectations. ISO 14001 Envi-

ronmental Certification ensures that we continuously monitor the impact which our activities have on the environment. ISO 45001 Certification confirms our commitment to our employees' health and safety in the workplace. And that's not all. Our pledge to sustainable development is both a responsibility and an opportunity, because it is a way of investing in the younger generations. That is why our sofa production process makes almost exclusive use of energy produced by 21,000 photovoltaic panels heated by the generous sunshine of Puglia and Basilicata. Clean, renewable energy that reduces CO2 emissions by 3,400 ton-

nes per year, equivalent to the exhaust emissions of around 1,200 cars. These results represent a significant contribution to environmental protection. In addition, Natuzzi has been granted FSC certification, which acknowledges that our joinery uses only wood from renewable, responsibly managed forests. Our upholstery factory also manufactures Ecoflex polyurethane without using freon or other harmful blowing agents. The world is our house and we like to feel at home here.

SOFA
